

Product Information

PocketCinema V10

Mobile Projector--Makes the world your display

PocketCinema V10

❖ **Product overview**

Traditional projectors are for presentation in meeting or training occasions. They are big in terms of size and weight. Home users using projector as a part of home theater is continually growing.

The target market of PocketCinema V10 is personal entertainment and business travelers. The design emphasizes pocket-size and light weight—about 155g. Not only is a projector but also a standalone media player. With mobile phone-like size and rechargeable battery, V10 can be used any time and anywhere under proper projection distance and lighting environment for fun, entertainment, and business applications.

❖ **Product features**

- A mobile media player mini-projector playing back picture, MP3, and video clips
- Projects image up to 50" large screen within distance from 21cm to 180cm.
- Projects image from connecting to iPod, DV, DSC, game console or mobile phone (via AV-out) or from playback in embedded 1GB flash memory or SD/MMC/MS Pro memory card.

- A handy tool for small group meeting and presentation
- Li-Ion battery and Remote control supported
